

61st FITCE International Congress

Organized by

In collaboration with

Deadlines

Special Session proposal:
March 30th, 2022

Preliminary paper submission:
April 30th, 2022

Notification of acceptance:
July 10th, 2022

Final Paper (Camera Ready):
September 10th, 2022

FITCE/AEIT Secretariat

Via Mauro Macchi, 32 • 20124 Milano

Email: fitce2022@aeit.it

Web site: <https://convegni.aeit.it/fitce2022>

Call for papers

Rome, September 29 - 30, 2022

Future Telecommunications: Infrastructure and Sustainability

In near future, great part of worldwide data will be produced by machines for other machines, supported by proper networks able to guarantee specific requests ranging from ultra-broadband up to massive connections and ultrareliable links. Artificial intelligence is expected to process such data, also to limit Human control and management on these systems. 5G is now a reality and 6G is already in front of us, providing chances to let the wireless signal propagating mainly towards the receiver with the cooperative support of environments equipped with intelligent devices and surfaces. This smart management of the electromagnetic issues can help also to observe emission limitation regulations. Space applications are becoming easily accessible, but their set up may introduce unexpected risks. Intentional data degradation by unauthorized actors must be contrasted. Electronic chips and devices should be produced out of monopolistic advantages. Quantum computers and quantum communications will disclose further opportunities, but also possible threats. Precise international regulations and recommendations are expected to give clear frameworks in which permitted operations are possible. In this scenario, Covid 19 pandemic added new challenges. All the countries in the world are devoting large funds to favor recovery and resilience against the economic and social effects of pandemic. Next Generation EU represents the most important facility of this type in European nations. In UK a similar government recovery strategy is on the point of starting. All these aspects of future telecommunications would impact on the concept of technologic, economic and green sustainability, at either local or global level. The Congress aims to give proper hints for facing these fundamental questions, and to suggest possible long-term solutions. The Conference will be held in presence (depending on the pandemic situation) and it will also be virtual.

Topics of the Congress

Ultra-wideband access, edge computing, smart surfaces, antenna sensors and devices, electromagnetic network planning, national and inter-national cloud, data security, human interaction and exposure, space networks, green and optical network and devices, application to IoT and Industrial Networks legal aspects, recovery and resilience plans, research programs.

Authors are invited to submit preliminary papers containing a complete description of the proposed technical contribution along with results, suitably framed in the related state of the art. Conference content will be submitted for inclusion into IEEE Xplore as well as other Abstracting and Indexing (A&I) databases. Authors are invited to submit their manuscript proposal through the conference website EDAS (<https://fitce2022.edas.info/>), indicating the track name into the manuscript, and up-loading the file in the specific track folder.

IEEE Technical Sponsorship is pending.

Scientific Track

Network Architectures, Programmable Networks, Network and System Intelligence, Radio Communications and Smart Environment, Optical and Quantum Communications, Sensors and Devices, Service Management, Domain Specific Networks, Space Applications, Cyber Security, Telco Sustainability

Industrial Technology Track

Products, Services, Manufacturers, Operators, Regulation, Competencies and skills

Papers submitted in the Scientific Track will be peer reviewed in a selective procedure. Accepted papers that will be orally presented at the conference, are expected to be included in IEEE Xplore.

Papers submitted in the Industrial Track will be accepted provided that at least one of the authors subscribes the participation fee.

Special Sessions

The conference will include Special Sessions on highly specialized topics reporting technical trends and breakthroughs within the scope of the conference and the tracks. Special Sessions are organized at the initiative of one or more individuals, who must adhere to specific procedures published at the conference website. Proposers of Special Sessions are invited to submit their form to the Conference Secretariat.

Executive Committee

Maurizio Mayer ■ AICT and Vice President Fitce, Italy - General Chair
Giovanni Cancellieri ■ President AICT, Italy - General Co-Chair
Daniele Riccio ■ University of Naples Federico II, Italy - Technical Program Chair
Daniele Giusto ■ University of Cagliari, Italy - Technical Program Co-Chair
Antonio D'Alessandro ■ Sapienza University of Rome, Italy - IEEE Photonics Society, Italy Chapter Chair
Stefano Pirani ■ AEIT, Italy - Web Services Chair
Adamo Nicola Panzanella ■ AEIT, Italy - Logistics Chair
Andrea Penza ■ AICT, Italy - Industrial Technology Chair
Francesco Matera ■ Fondazione Bordini, Italy - Research Center Chair
Alessio di Simone ■ University of Naples Federico II, Italy - Publication Chair
Gianfranco Veglio ■ AEIT, Italy - Finance Chair

Technical Programme Committee

Daniele Riccio ■ University of Naples Federico II, Italy - Technical Program Chair
Daniele Giusto ■ University of Cagliari, Italy - Technical Program Co-Chair
Alessio di Simone ■ University of Naples Federico II, Italy - Publication Chair
George Agapiou ■ Fitce, Greece
Pablo Angueira ■ University of the Basque Country, Spain
Silvella Betti ■ University of Rome Torvergata, Italy
Giuseppe Bianchi ■ University of Rome Torvergata, Italy
Filiberto Bilotti ■ University of Rome TRE, Italy
Giovanna Calò ■ Politecnico di Bari, Italy
Antonio Daniele Capobianco ■ University of Padova, Italy
Carlo Cecati ■ University of L'Aquila, Italy - IE - Industrial electronics Italy Chapter Chair
Alessandra Costanzo ■ University of Bologna, Italy
Annamaria Cucinotta ■ University of Parma, Italy
Costantino De Angelis ■ University of Brescia, Italy
Antonella D'Orazio ■ Politecnico di Bari, Italy
Giovanni Garbo ■ University of Palermo, Italy
Giorgio Giacinto ■ University of Cagliari, Italy
Fabrizio Granelli ■ University of Trento, Italy
Maria Sabrina Greco ■ University of Pisa, Italy
Raffaella Guida ■ University of Surrey, UK
Antonio Iodice ■ University of Naples Federico II, Italy
Václav Křepelka ■ Fitce, Czech Republic
Leonardo Lizzi ■ Université Côte-d'Azur, France
Marco Martalò ■ University of Cagliari, Italy
Francesco Matera ■ Fondazione Ugo Bordini, Italy
Giuseppe Mazzarella ■ University of Cagliari, Italy - SIEm, Società Italiana di Elettromagnetismo Chair
Franco Mazzenga ■ University of Rome Torvergata, Italy
Miguel Merino ■ University of Vigo, Spain
Marco Donald Migliore ■ University of Cassino and Lazio Meridionale, Italy
Luca Mottola ■ Politecnico di Milano, Italy
Enrico Natalizio ■ Technology Innovation Institute Abu Dhabi, United Arab Emirates
Giorgio Parladori ■ AICT, Italy
Paolo Pintus ■ University of California at Santa Barbara UCSB, USA
Vlad Popescu ■ Transilvania University of Brasov, Romania
Paolo Rocca ■ University of Trento, Italy
Luca Santamaria ■ Université Côte-d'Azur, France
Giovanni Schembra ■ University of Catania, Italy
Raffaele Solimene ■ University of Campania Luigi Vanvitelli, Italy
Marina Settembre ■ Fondazione Ugo Bordini, Italy
Rafael Sotelo ■ University of Montevideo, Uruguay
Jorge A. Tobon Vasquez ■ Politecnico di Torino, Italy
Giuseppe Vecchi ■ Politecnico di Torino, Italy
Marc Verbruggen ■ Fitce, Belgium
Francesca Vipiana ■ Politecnico di Torino, Italy
Alessandro Vizzarri ■ University of Rome Torvergata, Italy

Industrial Technology Committee

Andrea Penza ■ AICT and Ex President Fitce, Italy - Industrial Technology Chair
George Agapiou ■ Fitce, Greece
Vincenzo Cortese ■ Sirti, Italy
Stefan Rugel ■ Fitce, Germany
Maria Rita Spada ■ AICT, Italy
Loredana Vajano ■ AGCom, Italy
